Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 to 4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feldt (US 4,682,376) in view of Adams et al (US 3,932,903). Feldt shows a delivery bed that includes a base frame 10, a frame 13 supported upon links 11 to the base frame 10, and a patient support surface defined by head section 15, seat section 14, and leg support section 16. The leg support section 16 is formed by a frame 16 that telescopes within the frame 13. A support surface 21 is placed upon the frame 16 and serves to support the legs of a patient. Note that the support surface 21 is narrower than the seat section and head section of the bed, and that the entire patient support surface can be considered to form a patient support deck with a first width and second width as claimed. The Feldt bed lacks any siderails to prevent a patient from rolling or falling off the support surface defined by the bed. Adams et al teaches that it is well known in the art to provide a patient support with at least a pair of siderails 12 supported upon a pair of pivot links 17 which can be dropped and retracted into a storage position underneath the support surface of the bed. This allows access to the side edges of the bed and ready access to a patient placed upon it, while at the same time providing for patient safety by raising the siderail. It would have been obvious to the skilled artisan to have provided the Feldt delivery bed with at

least a pair of pivoted siderails that can be retracted underneath the patient support deck as taught by Adams et al for this reason.

Response to Arguments

Applicant's arguments with respect to claims 1 to 4 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 9 to 17, 19, and 20 are allowed.

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Peck shows a bed which can assume a chair position which is of general interest. Ekkerink and Weismiller et al (US 5,940,910) show a mattress or cushion assembly with a stepped bottom portion that is of general interest. Kuck et al shows a siderail assembly for a bed which is of general interest.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
